

Energy Policy

Declaration of Commitment

As part of its commitment to sustainability principles, Lynas Malaysia SDN BHD will allocate the necessary resources to develop and implement a strategic energy management plan. Lynas Malaysia SDN BHD is committed to practice energy efficiency throughout all our buildings, plant and equipment to reduce our energy consumption and its related environmental impact.

Vision

We are continually approaching energy management in a strategic manner allowing for the proactive pursuit of optimal energy solutions that lead environmental, societal and economic benefits.

Policy

The policy is to implement energy management activities in all areas of the Organization and to control energy consumption in order to:

- Increase energy efficiency
- Improve cost effectiveness and productivity
- Invest in new technology where it meets investment criteria
- Increase staff awareness on energy matters
- Give high priority to energy efficiency investment
- Set up a sustainable energy management system (SEMS)
- Publish the organization's energy policy
- Consider life cycle energy cost and procure energy efficiency for all new projects, plant and equipment
