Lynas Malaysia Achieves One Year 'Lost Time Injury Free'

Lynas Corporation (ASX:LYC, OTC:LYSDY) is proud to announce that Lynas Malaysia has achieved one year 'lost time injury free' as at July 2019. This is the result of the company's continued commitment to the highest safety standards and operational excellence.

Workplace safety is an important issue for all industrial plants in Malaysia and Lynas has implemented world-class safety standards at its rare earths processing plant in Gebeng. A lost-time injury (LTI) is an injury that results in time lost from work of one day/shift or more.

Commenting on the milestone, Dato' Mashal Ahmad, Managing Director of Lynas Malaysia, said: "Safety and sustainability are at the heart of Lynas Malaysia's operations and this milestone is a direct result of our team's dedication and professionalism. All of our staff and contractors are safety conscious and follow the correct safety procedures.

"The safety of our people, our communities and the environment will always be our first priority. A year without a lost time injury means our staff are safe and can all go home happily to their families," Dato' Mashal said.

Lynas Malaysia has a comprehensive safety management system including policies, risk assessments, investigations, audits, inspections, safety meetings, safety committee, reporting, emergency response, procedures, training and Personal Protective Equipment.

This safety milestone follows Lynas Malaysia recently being awarded a gold medal CSR rating by EcoVadis. Lynas Malaysia is rated among the top 5% based on the company's performance across the environment, labour and human rights, ethics and sustainable procurement. Lynas also became a signatory to the United Nations Global Compact, the world's largest corporate sustainability initiative, earlier this year.

In September 2018, Lynas Malaysia was received ISO recertification from the National Institute for Occupational Safety and Health (NIOSH), the Malaysian accredited certification body, under OHSAS 1800:2007 Occupational Health and Safety Management, ISO 9001:2015 Quality Management, and ISO 14001: 2015 Environmental Management Systems.
