

29 April 2020

UPDATE ON TEMPORARY HALT TO PRODUCTION AT LYNAS MALAYSIA PLANT

Further to the announcements by Lynas Corporation Limited (ASX:LYC, OTC:LYSDY) (“Lynas”) dated 23 March 2020 and 15 April 2020, the Malaysian government has extended the Movement Control Order (“MCO”) to 12 May 2020, and the Lynas Malaysia plant remains in care and maintenance in compliance with the MCO.

Lynas Malaysia has already implemented strict health and hygiene protocols that meet and exceed the Ministry of Health’s requirements, while we await the government’s decision on our application for approval to restart operations. Products produced at the Lynas Malaysia plant are essential to the manufacturing supply chains for critical industries including automotive, medical devices (including ventilators), oil refining and machinery & equipment.

If you have any queries in relation to this announcement, please contact Jennifer Parker or Lauren Stutchbury, our communications consultants at Cannings Strategic Communications on +61 2 8284 9990.
